# MINING, BUSINESS AND STOCKS

# BETTER TONE TO MINING STOCKS.

Mammoth Did Some Soaring To day But Afterwards Took to The Tobaggan.

### SWANSEA IN THE ASCENDANCY.

Tetro Unchanged From Last Week's Quotations-Montana-Tonapah In Good Order.

There was a decidedly better tone to the mining stock market today. The business transacted was not heavy, but there was more animation displayed in the pit than has been customary for some time. Mammoth appeared in good order and started out with a sale regis. tered at \$1.25. The price then leaped to \$1,30, at which price 100 shares were transferred. The stock was then offered freely and the buyers relaxed their energy, getting the next bunch at their energy, getting the next bunch at \$1.22, and the next at \$1.20. At the close the stock was offered at \$1.20, while the last bid was marked up at \$1.12½. Montana-Tonopah opened strong and maintained fits strength, recording a sale at \$2.20. Swansea, which weakened on Saturday, made some gains again. On the curb, after call, brokers hid 42 cents for the stock. The support the stock is getting makes certain that some kind of a deal is pending, whereby this old time Tintic dividend payer will become very active again. Those on the inside, however, are not doing any talking for the benefit of the public. Tetro is practically where it left off lic. Tetro is practically where it left off last week.

The closing quotations and sales were posted as follows: TODAY'S QUOTATIONS.

### SILVER BELL STRIKE.

Recent Disclosures on California Level Look Encouraging.

Fred C. Raabe, superintendent of the Fred C. Raabe, superintendent of the Silver Bell, started for Salt Lake on company business and took with him some fine specimens of rock which he uncovered the night before at his property, says the Park City Rocord. The rock is very rich looking and assays from it are being awaited with interest. The discovery was made on what is known as the California level of the mine, and was not entirely supexpectmine, and was not entirely sunexpected. Mr. Raabe stated to a Record re porter that the great quantity of sur-face water which has found its way in to the mine has made progress somewhat slowly, and it is very unpleasant to work in. There is at least 30 feet of water in the winze now, although the water in the winze now, although the worst part of the season is over. Then, too, Mr. Raabe has a very limited force of men at work, so cannot develop as fast as he would like. He is confident, however, that in time he will strike it big and so be repaid for all of his trouble and efforts. He states that in going ahead 60 feet he encountered no less than 20 fissures, all carrying ore of value, and this, he believes, shows positively the presence of a large body of ore underneath, and that is what is now being sought. N. W. Sonnedecker of Salt Lake, the manager of the property, spent Sunday inspecting the property, spent Sunday inspecting the same, and is highly pleased with existing conditions. Mr. Raabe is an experienced miner and will no doubt make a mine of the Silver Bell if there

### THE ST. LOUIS-ONTARIO.

Park City Mine to be Scene of Some Vigorous Development Work.

The new machinery installed last fall at the St. Louis-Ontario mine at Park City is in operation. The company proposes to sink the shaft to the depth of 1,000 feet further. It is now at the 250 point. Advices from St. Louis, the headquarters of the company, are to the effect that ample funds have been provided to correct the control of the control of the correct that ample funds have been provided to correct the correct the correct that ample funds have been provided to correct the correct that ample funds have been provided to correct the correct that ample funds have been provided to correct the correct that ample funds have been provided to correct the correct that ample funds have been provided to correct the correct that ample funds have been provided to correct the correct that ample funds have been provided to the correct that the correct that ample funds have been provided to the correct that the correct t vided to carry on the work.

### MOUNTAIN CITY MINES.

Now that the attention of investors

An Enormous Mineral Belt Situated in Northern Portion of Elko County.

in mines is at last turned this way, says William Willis, the mining engineer, writing to the Elko Free Press from Mountain City, Nevada, it might be well to let them know what a big. from Mountain City, Nevada, it might be well to let them know what a big, undeveloped country we have in the northern part of this country, so that they need not fear that all the good ground has been taken up, sold or bonded during the past month, for there yet remains just as good things to be found as any we have so far located. As has been remarked by all of the strangers who have investigated this field during the past 30 days, it is astonishing such an exceedingly flue surface showing should have remained so long unknown to the outside world. Capital is pouring into Arizona, New Mexico and Mexico, where the mineral indications are far inferior to ours, and where climatic conditions, accessibility, etc., are not anywhere near as good and favorable as we have them here, simply because those countries, like the prosperous merchant, advertise the good things they have, and let it become known.

There is a mineral belt beginning at the Bruner desert and running almost entirely through the northern part of this county that has scarcely been looked at, and where the surface indications are such that were they in Colorado or any of the pushing mining states thousands of rone would be at

rado or any of the pushing min states thousands of men would be work developing and prospecting, numerous prosperous camps would be in existence where today is solitude Rock Creek, Burner, Good Hope, Corn-Rock Creek, Burner, Good Hope, Cornucopia. Bull Run, Edgemont, Tennessee Gulch, Gold Creek, Madras and numerous other points along this belt for a stretch of more than 100 miles and a width of more than 20 miles should be booming camps today and would be were they situated outside of Nevada, where the importance of this great mineral wealth would be recognized and also utilized; but it begins to look as though at last the outside world is beginning to recognize Nevada's great beginning to recognize Nevada's great future as a producer of the precious metals and it is only a question of time and a very short time at that, before this portion of the country will be thoroughly exploited, for while Colo-rado, Utah, Arizona and the other states have been pretty thoroughly looked over by the capitalist and proslooked over by the capitalist and prospector, this state, and especially Elko country, remains about all that is left of Virgin territory for either of them, and where the past production has seen such as we have had it here, and that from a few scattering districts, ther is not the least doubt but that the intelligent prospector of the present day, with the capitalist to follow aim, will make some wonderful discoveries here, which will draw the attention of the whole mining world towards us.

make some wonderful discoveries here, which will draw the attention of the whole mining world towards us.

Tuscarora produced nearly \$40,000,000 from the shallow depth of 500 feet. Cornucopia, with one mine in operation in the early days, produced between. \$5,000,000 and \$6,000,000 from a depth of less than 500 feet and then the camp was deserted because at that depth the vein faulted and they sould not find it again. Bull Run mountain is seamed with veins of quartz carrying gold, silver, lead and copper, and ranging in width from three to 20 feet, while the values run very high also; in fact there is no question but that we have a higher grade of mineral on the surface of this country, taking it as a whole, than can be found in any state in the Union. The camp of Mountain City has a record in the assessor's office of numbers of tons of float quartz which was milled here in early days and upon the net profits of which they paid a quarterly tax to the country showing a net profit of \$168 per fon for float and the profit of \$168 per fon for float and the profit of \$168 per fon for float and the profit of \$168 per fon for float and the paid and the profit of \$168 per fon for float and the profit of \$168 per fon for float and the profit of \$168 per fon for float and the terly tax to the county showing a net profit of \$168 per ton for float, and the veins from which this float came have not yet been discovered. What other country is there where such conditions existing hundreds of men would not be at work to find the source from whence this float came? Mardis, Gold Creek and Tennessee Gulch have numerous veins cutting through the granite, slate and porphyry which run in gold from and porphyry which run in gold from \$10 to \$150 from the croppings and with scarcely a soul prospecting them. Now that the phenomenally rich ore found here is bringing representatives of the great mining men of Utah and Colorado, men like Newhouse of Utah and Smith and Moffatt of Colorado, and when they are sources to see foot when they are so anxious to get a foot-hold here as these representatives have hold here as these representatives have been and have shown by the fact that they have bonded several groups of claims, making a payment down of from 10 to 20 per cent of the purchase price, it looks as though we had what we claim for this country, and that in a very short time we will be able to prove to the world by the shipments of ore and bullion that we undoubte ly have in the northern part of Euro county one of the greatest mineral belts in the world.

Beck Tunnel Articles.

Articles of consolidation of the Bullion-Beck Tunnel company and the La Reine Mining company were filed in the office of Secretary of State Hammond today. The new company will be known as the Beck Tunnel Consolidated Mining company and its office is at Proknown as the Beck Tunnel Consolidated Mining company and its office is at Provo. Its capital stock is \$100,000 divided into shares of the par value of 10 cents each. Of the capital stock 500,000 shares is turned over to the stockholders of the Bullion-Beck company, 300,000 shares to the stockholders of the La Reine company and 200,000 goes into the treasury. Jesse Knight is president of the new company; Jacob Evans, vice president; R. E. Allen, secretary and treasurer. They with Henry Dinwoodey and E. H. Mead, constitute the board of directors.

## RETURNS FROM MOAPA.

C. A. Herman, the Mining Engineer, Tells

Of Conditions at New Nevada Town. U. S. Deputy Mineral Surveyor Chas A Herman has returned from a trip to the town of Moapa on the Salt Lake Route, where it crosses the Moapa dition to that growing town for Wm. B. Stanley, which already contains two stores, two saleons one bakers and one stores, two saloons, one bakery and one good eating house. The merchants are James McEntee and the Smith Bros. They have good stocks and do a good business.

usiness.
The floating population has left with the advance of the terminus of the nev rallroad towards Los Vegas. The re servation Indians have roasting ears, string beans and turnips for sale, wild grape vines entangel the willows along the river bank, and there is no doubt but what all semi-tropical fruits would thrive at this place. Mr. Herman says, including cotton. The elevation shows including cotton. The elevation aboves a level is 1,300 feet lat. 36 deg., 45 min

# POWER WILL SOON ENTER ALTA

Electrical Transformers And Columbus Con. Plant Will Be Started in Few Days.

### IMPORTANT EVENT IN CAMP.

Excavations for New Mill New Being Made-Three Cars of Machinery Have Arrived.

After weeks of annoying delays the transformers, which have prevented the starting of the Columbus Consolidated Mining company's electric power plant in Little Cottonwood canyon, have arrived and are now on the road between Sandy and the mine at Alta. It will take only a few days at the most to install them and by the end of the week the current will be turned on. This event will mark the beginning of a new era in the "camp above the clouds" and will be the ocasion for rejoicing among the citizens there. The camp will be lighted by electricity, for the first time in its history and the energy will be supplied for the operation of great machine drills where, heretofore, work was performed by

At the mine, the company has installed a large compressor plant and from this source the power required to operate the machine drills in the Columbus mine as well as those in several ad-joining properties, will be generated. Manager Tony Jacobson said today that shipments of high grade ore will soon be inaugurated again from the winze, sunk from the tunnel level, in which a large body of high grade ore was encountered several months ag and where work was stopped on ac count of the bad air. But now thi

count of the bad air. But now this werk can move on rapidly, the winze is to be sunk deeper and the ore body opened up. The ore carries values ranging from 10 to 200 a nees sliver and from 5 to 15 per cent copper.

The work of excavating for the new mill has been started and three car loads of the machinery has been delivered at Alta. The lumber required in the construction of the plant, about 125,000 feet, will arrive from the Oregon mills within the next few days.

mills within the next few days,
Manager Jacobson expects to push
the work of construction ahead rapidly
and places Sept. 15 as the latest date
when the plant will be ready for com-When completed, the mill will run on ore of a grade that will bring returns of \$1,000 per day.

### IN ELKHORN DISTRICT.

Harmon Cummings Rewarded After Years of Hard Work.

Provo, June 20.—Harmon Cummings, of Heber, is in the city, and brings encouraging reports from the Elkhorn mining district, situated near Hallstones, about eight miles south of Heber. Mr. Cummings has been interested in that district for fourteen years and has done considerable work, which now promises to bring good returns. He has driven a tunnel 450 feet in length on the Victoria claim, in which he has a vein of nine feet in width from which he has taken \$5.20 gold ore, also carrying copper and sliver, and the vein matter is improving. A shaft on the same property, only 30 feet in depth, however, shows the best results. It is on a contact of lime and porphyry, and shows three feet of ore, similar in appearance to the Ontario ore. No assays in has been made in this, but miners from Park City, whe have considered. June 20.-Harmon Cummings has been made in this, but miners from Park City, who have examined it are confident it will carry good values, basing their judgment on the similarity between that and the ore of the On

tario.

The Nelson brothers, who are also working some claims in that district, are meeting with very encouraging indications, and Mr. Cummings feels confident some good properties will be developed in the district when the necessory work has been done. sary work has been done,

### NEW COAL FIELD.

Large Vein Discovered Near Red Rock Station in Montana.

A large bed of coal has just been discovered in Beaverhead county, about 10 miles south of Redrock, on the Oregon Short Line, says the Idaho Falls Register. The beds comprise 52,000 acres of what experts call high grade bituminous coal, being partly in Mon-tana and partly in Idaho. Work on this deposit will be commenced at once. The discovery means cheaper coal for the big Montana smelters and to the infustries of southeastern Idaho.

### The Honerine Sampler.

James J. Burke, the contractor, spens vesterday at the Honerine properties at Stockton. He states the machinery for the new sampling mill is being installed and the plant will be in opera-

### CONCENTRATES.

Milton G. Oglesby is in Idaho, looking Manager R. H. Channing returned

his morning from a flying business trip o Denver. Director W. S. Brown of the Consoli-

dated Mercur company, departed for California today. It is reported that the Grand Prize mine, near Tuscarora, Nev., has been sold to Michigan parties.

Shipments of ore will soon be in-augurated again from the Tonopah-Belcher mines, near Tonopah.

The Victor mine at Baker City, Or. esume operations again shortly. W. H. Kinnon, former superintendent

of the Majestic smelter at Milford, is in Mexico "blowing in" a new plant. Frank Moorehouse, who has been in Mexico and in the east, on mining business for several months past, has re-

Supt. C. L. Rood of the Ontario went to Park City this morning, in response to the message informing him of the conflagration at that property.

Harry Joseph spent yesterday in specting conditions at the Silver Shield mine. He reported things moving along about as usual at that property.

CANNON IS EMPHATIC.

He Would Not Have the Vice

Presidency.

Chicago, June 19.—In view of a threatened revival of the movement to name Speaker Cannon for the vice-precidency, charged this time to the New York delegation, Mr. Cannon authorized the Associated Press to quote him as follows:

'After mature consideration, having

in view the great compliment that the vice presidential nomination would be

vice presidential nomination would be to any citizen, yet I am speaker of the house of representatives, and have been a member of that body for nearly 30 years. I feel that my sphere of usefulness, if I have any, is in connection with the house. About a week after the close of the late session of Congress, at the request of friends and perhaps others, I gave out an interview on this subject. This was done after full consideration, and stand by the interview, which stated in substance that I considered the speakership the second highest office under the government, and, if the next house was Republican, I hoped to succeed myself, and if not, to cheerfully do duty on the minority."

Mr.Cannon concludeshis interview with the statement that he was not now a candidate for the vice precidency that he would not at any future time be a candidate and would not under any

conditions accept the nomination.

him as follows:

minority.

specialty.

BOOK BINDING

Joseph Dederich expects to leave for the Newl cuse properties in Beaver ounty tonight. Tonopah stocks are very active in San Francisco at the present time, and the San Francisco-Tonopah stock exchange

eems to be doing considerable business. George Z. Edwards has returned from making an inspection of the Panaca mine in southeastern Nevada. He has good things to say about this property and declares it has passed that prospect stage of development.

General Superintendent C. E. Allen of the United States Mining company went to Ogden today to meet Managing Di-rector A. F. Holden, who passed through that point enroute from Cali-fornia to New York.

Charles T. Harte, former publisher of the Milford Times, departed for his new field of labor at Nampa, Ida., where he recently purchased the plant of the Nampa Times. He has enlisted the services of H. Clay Browniee, an old newspaper man of this city.

Tuscarora, Nev., is picking up again Tuscarora, Nev., is picking up again and the camp is becoming quite active. A great deal of prospecting has been done this year, and the results have been quite satisfactory. Added to this is the Mountain City excitement. All parties going to Mountain City from Elko pass through Tuscarora. Elko pass through Tuscarora.

Woodriver News-Miner: W. S. Mc-Cornick of Salt Lake City, for \$1 and other good and valuable considerations, has conveyed to Boyd Park of the same place an undivided half of the Eureka mine, situated on the northeast side of Cottonwood creek, and lying northwesterly from and adjoining the Idahoan mining claim, in Mineral Hill district.

greatly reduced during the past week, says an Ely, Nevada, publication, pend-ing a satisfactory adjustment of differences between the controlling in-terest of Loring & Son and the stock-holders of the New York and Nevada Copper company. The suspension will be only temporary, or until such time as a complete understanding as to the future policy of the company has been agreed upon by those interested, when operations will be resumed and continued uninterruptedly till the property has reached a stage of productiveness.

Says an Ely, Nev., paper: At the White Pine Copper company's Ruth group of mines everything represents a hive of industry. The lumber necessary for the building of experimental concentration plants, with which the adaptability of the Ruth ore to that treatment is to be ascertained, is on the ground, and John B. Fleming, the engineer in charge of the construction, has already begun work upon the building. During a recent visit to building. During a recent visit to Salt Lake City all the necessary machinery for the plant was contracted for by Mr. Fleming, and it will all be on the ground in the next few weeks, or as early as required.

# TONE OF MARKET AT OPENING FAIR.

Southern Pacific and St. Paul Were the Chief Features Throughout.

### SOME SHRINKAGE BUT SLIGHT.

Buying Converged on S. P. for a Time, The General List Stiffening In Sympathy.

New York, June 20 .- The tone of the opening of the stock market today was firm with some advances, except for Metripolitan Street Railway which ran off a Southern Pacific and St. Paul advanced

%. The market was narrow and dull. A further relapse to 1101/2 by Metropolitan Street Rallway, and large realizing in Southern Pacific forced the active stocks back slightly. The advance was resumed later under the leadership of United States Steel preferred, which was bought in large blocks up to 55%. Other favorites old well above Saturday's close, especialy St. Paul, Southern Pacific, Missouri

ly St. Paul. Southern Pacific, Missouri Pacific, Amalgmated Copper and Brooklyn Transit. Anaconda rose 2½.

There was some shrinkage in the demand, but prices yielded but little, Southern Pacific was lifted % over last week. Republica Steel preferred advanced 1½ and St. Joseph & Grand Island first preferred 1. Metropolitan Securities fell a point, and General Electric 1½.

Boulds were firm at noon,
A renewed decline in Metropolitan St. Rallway was ignored by the general market, which, however, was very dull. Metropolitan Street Rallway sold at 109% or 2% below last week's close.

Buying converged on Southern Pacific for a time during the afternoon, and it rose to 40%. While the general market siffened in sympathy, the improvement was of little consequence. Toledo, St. Leuis & Westerr advanced 1½ and the preferred 1%.

preferred 1%.
United States Realty preferred rose 2 points; Metropolitan Street Rallway and Metropolitan Securities rallied a point, but the average price level was inclined to sag on very light ourings. The Eries were noticeably heavy. The closing was below the best all around and was virtually inactive.
